

Add a new country

[illegible]

The screenshot shows the H2 console interface in a web browser. The left sidebar displays a file tree with the following structure:

- jdbc:h2:mem:countrydb
 - COUNTRY
 - INFORMATION_SCHEMA
 - Users
- H2 2.1.214 (2022-06-13)

The main area shows the SQL statement:

```
SELECT * FROM COUNTRY;
```

The execution results are displayed as a table:

CO_CODE	CO_NAME
IN	India
US	United States
GB	United Kingdom
CA	Canada
JP	Japan
FR	France
DE	Germany

The status bar at the bottom indicates: (7 rows, 5 ms)
