

Exercise 1: Implementing the Singleton Pattern

The screenshot shows the Eclipse IDE's console window. The title bar includes 'Problems', 'Javadoc', 'Declaration', and 'Console'. The console output for 'SingletonTest [Java Application]' is as follows:

```
<terminated> SingletonTest [Java Application] C:\Users\HP\p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.full.win32.x86_64_21.0.9
Logger instance created.
LOG: First message
LOG: Second message
Only one Logger instance exists.
```

Exercise 2: Implementing the Factory Method Pattern

The screenshot shows the VS Code terminal window. The title bar includes 'PROBLEMS', 'OUTPUT', 'DEBUG CONSOLE', 'TERMINAL', and 'PORTS'. The terminal shows a PowerShell prompt and a Java command being executed:

```
PS C:\Users\VP\GitDemo\CTS_HANDSON\Week1_Deepskilling\DesignPatterns\FactoryMethodPattern> & 'C:\Program Files\Java\jdk-11\bin\java.exe' '-cp' 'C:\Users\VP\AppData\Local\Code\User\workspaceStorage\7289ac3b546f244ad6597389a89316c3\redhat.java\jdk_us\
FactoryMethodPattern_JdScene8e\bin' 'FactoryTest'
Opening Word Document
Opening PDF Document
Opening Excel Document
PS C:\Users\VP\GitDemo\CTS_HANDSON\Week1_Deepskilling\DesignPatterns\FactoryMethodPattern>
```

At the bottom of the terminal, there is a status bar that says 'Activating Oracle SQL Developer Extension for VS Code...' and 'Ln 14, Col 2'.
